PROJECTS

Project Management Website

Developer

- Utilized Firebase as the backend and React.js for the Front end to make the single page application, with SignIn and Signup feature as well as live chatting features for the project that we are working on.
- Used CSS, SASS with Semantic UI as well as other NPM packages for the design.

E-Commerce Website

Developer

📅 March 2022 - current

- E-commerce Website using Firebase as the backend and SignIn and SignUp feature.
- Sate Management using Redux and Context API
- Payment using Stripe

CAREER OBJECTIVE

Eager to expand my skill set through external trainings to help boost all major front desk KPIs. Hopping to meet and work with new people.

EDUCATION

B-Tech
Computer Science
Lovely Professional University
📅 2021 - current
🎓 GPA: 8.4

SKILLS

Technical Expertise
JavaScript
